Finally

Autumn is a great time of the year to plant your bulbs ready for them to bloom in Spring time.

Talk to your child about the things that you need to plant the bulbs. I have included some useful vocabulary for you.

Have some fun letting your child plant the bulbs by following your instructions. Once you have modelled the instructions to your child, it can be their turn to tell you how to plant the bulbs.

Use the ordinal words in red to structure your instructions.

Make it easier: Only give one instruction at a time.

Make it harder: Chunk two or more instructions together.
